XINYU WEI

Brussels, Belgium | weixinyu25@gmail.com | xinyuwei25.github.io

PROFILE

Applied microeconomist completing a PhD at ECARES, Université libre de Bruxelles (expected summer 2027). Studies how households absorb income, employment, health and care shocks, and how public policy and families protect them, using household panels from the UK, wider Europe and China.

- **Research:** hours constraints and welfare; care within older couples; income risk and consumption smoothing in China; an evaluation of Belgium's COVID-19 temporary-unemployment benefits.
- **Methods and tools:** event studies, overlap weighting, revealed-preference methods and machine learning; Stata and R (advanced), Python (intermediate), Excel.
- **Exceptional quantitative foundation:** Bronze Medal, Chinese Mathematical Olympiad national final; Honourable Mention, international Interdisciplinary Contest in Modeling.
- **Communicating evidence:** wrote public reports on economic policy for a general audience; native Mandarin, fluent English; has studied and worked in China, Hong Kong, the US and Belgium.

EDUCATION

UNIVERSITÉ LIBRE DE BRUXELLES, ECARES — Brussels, Belgium
PhD in Economics and Management (supervisor: Prof. Bram De Rock) — *Sep 2023 – expected 2027*
Research Master in Economics and Statistics; GPA 14.82/20 — *Sep 2021 – Sep 2023*

THE CHINESE UNIVERSITY OF HONG KONG — Hong Kong
MPhil in Economics; GPA 3.6/4.0 — *Aug 2019 – Jul 2021*

GEORGETOWN UNIVERSITY — Washington, DC, USA
MA in Applied Economics; GPA 3.8/4.0 — *Aug 2015 – Aug 2016*

XI'AN JIAOTONG UNIVERSITY — Xi'an, China
BSc in Economics; GPA 3.5/4.0 — *Aug 2011 – Jul 2015*

RESEARCH

Working papers

When Care Supply Becomes Care Demand: Partner-Care Exit and the Destination of Outside Support (2026)

- When caregivers in older couples develop their own limitations, they become 20 percentage points more likely to stop partner care, and much of the new outside help goes to them rather than to the original recipient (SHARE).

Hours You Cannot Choose: The Welfare Cost of Hours Constraints (2026)

- Many workers cannot choose their hours. Using Dutch and British household panels, shows that hours constraints are common, concentrated among higher earners and as costly for well-being as income poverty; bringing quantity rationing into nonparametric revealed preference, bounds the welfare loss at 6–32% of income for the median overemployed single.

Income Risk Exposure and Consumption Smoothing in China (2026)

- Low-income Chinese households face about 40% larger transitory income shocks, yet smooth consumption no worse: their vulnerability comes from exposure to risk, not weaker insurance (CFPS).
- Presented at the Mannheim Applied Seminar, University of Mannheim (Mar 2026) and the ECARES Internal Seminar (Feb 2026).

Temporary Unemployment and Household Outcomes in Belgium (joint, HAIOPOLICY project; work in progress)

- An event-study evaluation of whether Belgium's COVID-19 temporary-unemployment benefits protected household income and employment (EU-SILC/BE-SILC panels).

Replication

A Comment on "Kin Networks and Institutional Development"

With Jean Degroot, Paula E. Gobbi and Alejandra Ramos | *I4R Discussion Paper No. 126, 2024* | *Paper*

- Reproduced the published results and identified two minor coding errors that did not change the estimates; tested robustness using an alternative sample of historical cities.

Policy and public-facing reports

Reports on the US Economy and Federal Reserve Policy

Shenzhen Finance Institute, CUHK-Shenzhen | *2017–2019* | *In Chinese* | *Selected report*

- Lead-authored regular public reports throughout the appointment, analysing US macroeconomic conditions, financial markets and the Federal Reserve policy outlook for a general audience.

PROFESSIONAL EXPERIENCE

ECARES, UNIVERSITÉ LIBRE DE BRUXELLES — Brussels, Belgium
Doctoral Researcher, HAIOPOLICY research project (Belgian income distribution) — *Sep 2023 – Present*

- **Built the longitudinal EU-SILC/BE-SILC panels and analysis pipeline** for the project team; produced measures of income mobility, volatility and persistent low income.

- **Work with a postdoctoral researcher and senior project members,** delivering data, code and statistical analysis to project timelines.

THE CHINESE UNIVERSITY OF HONG KONG Hong Kong
Teaching Assistant (part-time, during MPhil) *Aug 2019 – Jul 2021*

- Led problem-solving tutorials and graded assignments for undergraduate macroeconomics courses.

SHENZHEN FINANCE INSTITUTE, CUHK-SHENZHEN Shenzhen, China
Teaching and Research Assistant *Jul 2017 – Jul 2019*

- **Maintained US economic and financial datasets** and analysed Chinese local-government fiscal data for institute research; conducted replication checks on faculty papers.
- **Taught weekly Stata labs to about 80 students** and led tutorials for master's-level courses in monetary economics, international finance, Chinese financial markets, econometrics, time series and machine learning.
- **Coordinated programme operations:** recruitment presentations, applicant interviews, visiting-faculty logistics and external review documentation.

HARVARD UNIVERSITY, CHINA GAZETTEER PROJECT Cambridge, MA, USA
Visiting Research Assistant *Sep 2016 – Jun 2017*

- **Coordinated daily data delivery for a five-person team** collecting and harmonising county-level data from Chinese gazetteers (Python, Stata); covered gaps to keep the team on schedule.
- **Ran data-quality checks** combining statistical screening with sample-based manual verification.

AGRICULTURAL BANK OF CHINA Yinchuan, China
Loan Officer Intern *Jul 2014 – Sep 2014*

- Assessed credit risk and compliance for household, self-employed and small-business loan applications; interviewed applicants.

SKILLS

- **Programming and statistics:** Stata, R (advanced); Python, MATLAB (intermediate); LaTeX.
- **Office software:** Microsoft Excel, Word and PowerPoint (proficient); Microsoft Access (basic).
- **Languages:** Mandarin (native), English (fluent).
- **Interests:** Guqin, the traditional Chinese seven-string zither.

HONOURS AND AWARDS

- Doctoral Scholarship, ECARES, Université libre de Bruxelles 2023 – present
- Postgraduate Studentship, The Chinese University of Hong Kong 2019 – 2021
- Third Prize (Bronze Medal), Chinese Mathematical Olympiad, National Final 2011
- Honourable Mention, Interdisciplinary Contest in Modeling (ICM), COMAP 2013
- First Prize, China Undergraduate Mathematical Contest in Modeling, Shaanxi Division 2012
- Second Prize, Xi'an Jiaotong University Mathematical Contest in Modeling 2012
- Si Yuan Scholarship and Yu Ying Scholarship, Xi'an Jiaotong University 2012, 2011
